DigiTech

Mandated by 2020 in QLD, this curriculum is an exciting opportunity for schools to implement learning that is futures oriented and challenging for our learners.

Knowing how to start is key. This day aims to instil in you the confidence to return to your school with a plan that suits your context. For those who have started, interact with ideas and experiences that will drive your next steps.

Connect with:

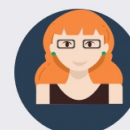

The Curriculum Writer's Perspective

The Leadership Perspective

The types of thinking key to this curriculum

Effective Classroom Practice in P-6

Workshops:

STEM - Using a design thinking framework

DATA - Deep thinking and problem solving with data
